Entheogens:

“a chemical substance, typically of plant origin, that is ingested to produce a non-ordinary state of consciousness for religious or spiritual purposes.”

Growing around the world – in various different regions

Ergot

LSD

DMT

Psychedelic Mushrooms

Fly Agaric Mushrooms

Entheogens:

The history of the use and the description of the rites performed with each entheogen does NOT depend on the religious ceremony or dogma when it is used...

Rather –

They depend on where that entheogen was found and used – in that local region!

ERGOT:

Ergot - is a parasite that can be found growing on grain.

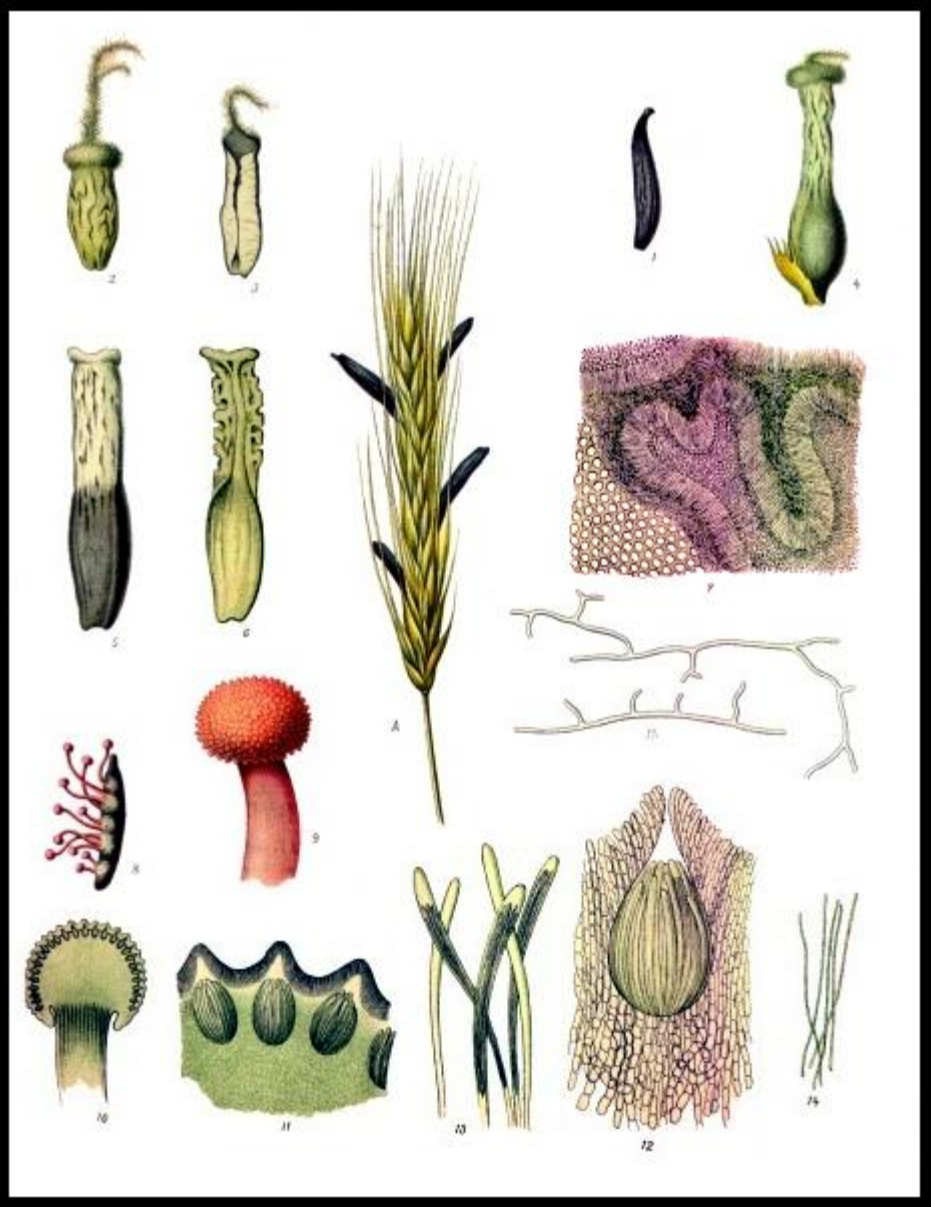

It appears as a dark crystal attached to the outside of the grain stem.

It is soluble in water.

This was probably used for centuries in the Temple of Diana Mysteries that were annually held in Greece.

This is what happened in the Mysteries of Eleusis.

The dosage was not exact and many people died in these rituals, because this is really a form of -

LSD:

Lysergic acid diethylamide –
is a potent psychedelic drug that intensifies thoughts, emotions, and sensory perception.

Often referred to as acid or lucy, LSD can cause mystical, spiritual, or religious experiences.

At higher doses, it primarily induces visual and auditory hallucinations.

LSD is not considered addictive, because it does not produce compulsive drug-seeking behavior. Using LSD can lead to adverse psychological reactions, such as anxiety, paranoia, and delusions.

Not fun – and not recommended.

DMT:

N,N-Dimethyltryptamine (DMT or N,N-DMT) -
is a substituted tryptamine that occurs in many plants and animals, including humans,
and which is both a derivative and a structural analog of tryptamine.

DMT is used as a psychedelic drug and prepared by various cultures for ritual purposes
as an entheogen.

DMT has a rapid onset, intense effects, and a relatively short duration of action.

The effects of DMT can be made much stronger by also ingesting an inhibitor.

DMT:

The use of DMT is interesting in that the human body automatically produces an inhibitor to block the effects of DMT when ingested.

In order to remove that automatic inhibitor, an additional monoamine oxidase inhibitor (MOI) must also be ingested to allow the body to experience the full effects of the DMT.

Studies are On-Going Now at Stanford University...

Ayahuasca (South America)

Two parts:

A plant containing the potent DMT, usually *Psychotria viridis*, and

The MO Inhibitor, usually *Banisteriopsis caapi* vine

About 90% of the people asked about their experience when using DMT have claimed that -
That experience was one of the MOST IMPORTANT EXPERIENCES in their life!

DMT:

Free Masonry (World Wide)

The Acacia Tree is an important Masonic Symbol, and
Its wood and bark contain DMT!

The effect of the wood when ingested is very mild –
UNLESS –

Like with Ayahuasca,

The MO Inhibitor is added to allow its full effect!

So - What is that MO Inhibitor that can be used for the Acacia Tree?
Is it a Masonic Secret? (I don't know...)

If it was found by a private “Masonic Group” – it “could be a secret”...
If rose petals worked for that – then that would explain the birth of
Rosicrucian Masonry!

Recorded Masonic Degree Using an Entheogen:

The use of some kind of entheogen in a formal “Masonic Degree” is documented in the book “The Masonic Magician – The Life and Death of Count Cagliostro and His Egyptian Rite”

This Egyptian Rite was created by Cagliostro (1743-1795) and was proposed and marketed to be part of Masonry within the Scottish Rite as it existed at that time (as established in 1733).

It contained three degrees, and in the second degree, the candidate was given to drink “primal matter.” This would allow him to receive “Direct experience as well as direct knowledge!”

The purpose was for the candidate to experience god and overcome death. This gave the candidate actual and experiential proof of life-after death: gnostic! Not just the intellectual “thinking about”!

As this occurred in Germany, it is assumed that the entheogen used was either Ergot or Acacia Tree wood with an MO Inhibitor. It is also documented that Cagliostro was given the formula of this primal matter directly from Count Saint Germain!!!

Psychedelic and Psilocybin Mushroom:

Are a type of hallucinogenic mushroom and a polyphyletic informal group of fungi that contain the psilocybin, which turns into the psychedelic psilocin upon ingestion.

Too many to discuss here.

Not recommended.

Fly Agaric Mushrooms: *Amanita Muscaria*

Commonly known as the fly agaric or fly amanita, is a basidiomycete of the genus *Amanita*. It is a large white-gilled, white-spotted, and usually red mushroom.

Despite its easily distinguishable features, *A. muscaria* is a fungus with several known variations, or subspecies. These subspecies are slightly different, some having yellow or white caps, but are all usually called fly agarics, most often recognizable by their notable white spots.

Recent DNA fungi research, however, has shown that some mushrooms called "fly agaric" are in fact unique species, such as *A. persicina* (the peach-colored fly agaric).

What Does This Particular Entheogen Do?

Researchers say that “It doesn’t DO anything...”

Like the other Entheogens do...

Instead -

It allows you to STOP THINKING !

Someone asked Jesus: What is Heaven like?

The Parable of the Empty Jar is found in the non-canonical Gospel of Thomas. It does not appear in any of the Canonical gospels of the New Testament.

The parable is attributed to Jesus and reads:

The kingdom of the father is like a certain woman who was carrying a jar full of meal. While she was walking on the road, still some distance from home, the handle of the jar broke and the meal emptied out behind her on the road.

She did not realize it; she had noticed no accident.

When she reached her house, she set the jar down and found it empty.

...And she was in Heaven.

Someone asked Jesus: What is Heaven like?

The meal represents thoughts – like seeds.

As she walked, she had less and less thoughts.

Less worries.

Less fears.

And when the last thought disappeared –

She was in Heaven!

OK.

The Monastery of Agios Pavlos (Saint Paul) is dedicated to Christ the Savior and is located on the west side of Mount Athos. Its existence first appears in documents of 972. Then it was mentioned in 1269. After the Catalan raids, it was degraded into a kellion, only to

‘To go down to the underworld while you’re alive, prepared and knowingly, and then learn from the experience – that is another thing entirely.’”

‘We must not look, but must, as it were, close our eyes and exchange our facility of vision for another. We must awaken this facility which everyone possesses, but few people ever use.’” [Note the Similarity to the sci-fi book Dune!]

“To get the beatific vision, you have to die for it.
The ego has to be destroyed. At least for a little while.”

“Whether it’s a few minutes or a few hours or a few days, it doesn’t take very long.
But everything you thought you knew about life – everything – has to be annihilated.”

This book then describes the author's own experiences in merging with an active and alive and loving "Heaven":

A Written Experience of Union With Heaven

By Clark Heinrich

<http://www.egodeath.com/BooksByClarkHeinrich.htm>

From the book:

The final part of the seamless vision was that it was my last seed, and then there was nothing. Before another thought could arise in my mind, in the midst of a great darkness and a great silence, the heavens opened above my head.

In an instant I was flooded with light from above, light of the utmost whiteness and splendour, that quickly dissolved everything in its glory.

The bliss I had experienced prior to this new revelation now paled to insignificance in an immensity of light that was also the purest love.

As the truth of the situation dawned on me the word 'FATHER' resounded in this heaven of light and I was taken up and absorbed by the unspeakable Godhead.

No longer separate, there was neither an enjoyer nor a thing enjoyed; there was union.

**The cat is out of the bag. Pandora's box lies open.
The cover has been blown off the ark of the covenant.**

**Wisdom cries in the streets and shouts from the rooftops, once again
trying to make herself heard above the din. Whoever has ears should listen.**

**Whoever has a voice should consider speaking up, for the time of the end is
near, as it always is in this brief life.**

**Let me testify in no uncertain terms: the kingdom of heaven is much closer,
and far easier of access, than we have been led to believe.**

And it is worth the trip.
